### Use of Non-GAAP Financial Measures

**Use of non-GAAP financial measures**

Peris Group, Inc. prepares financial statements in accordance with U.S. generally accepted accounting principles (GAAP). However, the Company believes certain non-GAAP performance measures and ratios which exclude penalty and fees on late payments, the impact of the COVID-19 pandemic, and certain non-recurring expenses associated with acquisitions, legal costs not associated with normal operations, and constant currency adjustments may provide additional meaningful comparisons between current year results and prior periods. Reconciliations from non-GAAP to the most directly comparable GAAP financial measures are provided below. These non-GAAP financial measures should be viewed in addition to, not as an alternative to, reported GAAP results.

The constant currency results assume that foreign revenues and expenses are translated from foreign currencies to the U.S. Dollar at rates consistent with the prior year, and that any benefit or loss caused by foreign currency fluctuations would be consistent with the prior year. To do this the company translates the current year's income statements into U.S. Dollars using the prior year's average exchange rates and then replaces the foreign exchange gain or loss for the current year with the balance from the prior year. Finally, the company calculates the tax impact of the constant currency results to reflect the current effective tax rate of the reporting period.
